Declaration concerning REACH

On 01.06.2007 the regulation (EC) No 1907/2006 about Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH) came into effect. The objective of this regulation is to register the chemical substances which are used and produced in the EU member states and to document their influences on environment and health.

Kniel System-Electronic GmbH is a manufacturer of power supplies and power supply systems. In the sense of REACH, we are downstream users. As a downstream user, Kniel System-Electronic GmbH is not subject to any registration obligations under REACH. The components used for the manufacture of our products or the substances required for them have already passed through the REACH process elsewhere.

We

- do not store and put in circulation harmful substances
- do not use harmful substances as such and do not process them within our industrial activities

As soon as we obtain information about harmful substances from our suppliers or manufacturers, we will forward this information to you immediately.

Please do not hesitate to contact us if you have further questions regarding this declaration or about our implementation of the regulation.

The declaration is issued for and on behalf of the manufacturer by

Karlsruhe, 06.06.2017
